

WATER TREATMENT EQUIPMENT

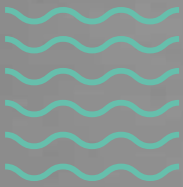

- Wastewater treatment plants and water resource recovery facilities.
- Raw-water screening for irrigation and industrial processes.
- Industrial effluent treatment equipment

dagequipment.com

**OVER 60 YEARS'
EXPERIENCE**

WATER INDUSTRY SECTORS

/WASTEWATER TREATMENT PLANTS

Waste removal and wastewater conversion into an effluent that can be directly reused or returned to the water cycle with minimal impact on the environment.

/INTAKE WATER SCREENING FOR IRRIGATION

Effective solids separation and high screening discharge capacity in agricultural channels and aqueducts prior to irrigation ponds and reservoirs.

/INDUSTRIAL WATER TREATMENT

The DAGA solutions are the result of a personalised design adapted to the flow and industrial application for a wide variety of industrial water treatments, including mechanical equipment for various treatments of pollutant removal, pollutant breaking-down and water aeration for food processing, slaughterhouses and meat processing, agricultural wastewaters, pharmaceuticals and chemical sectors, etc. The DAGA range of products is also applied to thermal, hydroelectric and nuclear plants' intakes, improving downstream pumping and pipeline efficiency.

DAGA products are designed and manufactured by the CALAF GROUP, within an integrated management framework of quality, environment, safety and health.

MAIN FEATURES

- High quality mechanical and machining components. ■
- Pre-engineered systems to be easily assembled. ■
- High capacity under demanding operation conditions. ■
- Easy maintenance and cheap spare parts. ■
- Low energy consumption. ■
- High reliability that enhances the biological and chemical processes. ■
- High residues removal of floating, settling and suspended materials. ■
- Excellent quality / price ratio and very long lifespan. ■
- Competitive prices and short payback period. ■
- Customer support service. ■

REFERENCES

- More than 2500 facilities, comprising wastewater treatment plants, water resource recovery facilities, sewage and industrial wastewater plants and raw-water screening for irrigation.
- We work in more than 30 countries on five continents.
- 36 DAGA people make up a team committed to the Customer.
- Over 60 years of experience.
- More than 1300 companies have already worked with us.

CERTIFICATION

DAGA products reflect the values of an industrial group committed to the environment and, especially, to the water cycle.
